Eleventh Annual Report

OF THE

CITY OF ROCHESTER,

NEW HAMPSHIRE,

FOR THE

Year Ending December 31st,

1902.

PRINTED BY
COURIER PUBLISHING COMPANY
ROCHESTER, N. H.

INAUGURAL ADDRESS OF MAYOR WILLIAM G. BRADLEY.

Gentlemen of the City Council :

Allow me first to express my heartfelt thanks and appreciation for the honor which the voters of the city have conferred upon me in electing me for the fourth time to the highest position that it is within their power to bestow, Mayor of the City of Rochester. Whoever receives these honors must or should assume the responsibilities. I fully realize that the position to which I have been called is a most difficult and troublesome one. It would have been more comfortable to me personally if I could have seen my way clear to avoid the responsibility which now devolves upon me. Not feeling it advisable to do this at this time, I accept the situation, feeling myself under a double obligation to do that which seems to me to be for the city's best interest and for that of the larger number of its inhabitants in general, and I promise you that I will strive to serve the public under all circumstances and conditions to the best of my ability so far as the conditions will admit. There is always a tendency to criticise public officials in their actions. There is a great deal of this criticism which in my opinion is not always just or fair. It is caused in a great measure by the fact that people who so act as critics do not look at the matter under consideration from all points of view, and they do not at all times have as thorough an understanding of the situation as do those whose duty it is to act.

And now, gentlemen, I ask for your hearty support in all matters pertaining to the city after due consideration, if found to be for the best interests of our citizens in general.

FINANCE

Is a subject of the greatest importance to us all, whether as individuals or as a nation, state or city; for we are all participating in the most remarkable growth and advancement that the world has ever known, at the present time, but it carries with it expenditures which, in order to be successful, must be met.

I will now lay before you the condition of our finances.

FINANCIAL STATEMENT.

Debt.

Outstanding bills approved, not paid,	\$ 1,091 01	
Outstanding notes,	115,482 19	
Sewer bonds,	90,730 00	
	<hr/>	\$207,303 20

Credit.

Due on collector's list,	\$17,995 17	
B. & M. R. R. stock,	800 00	
Cash in treasury,	10,489 99	
	<hr/>	\$29,285 16

Indebtedness, not including water bonds,	\$178,018 04	
There was hired this year on account of the new high school building,	\$16,396 84	
Also on account of the new fire station at East Rochester,	2,500 00	
	<hr/>	\$18,896 84

Had it not been for these two buildings, we would have reduced the debt \$19,740.04 instead of \$843.20.

HEALTH DEPARTMENT.

There is no department where the work is more important for the lives and health of our community than this. There have been 117 cases of contagious diseases which have been reported during the past year. It has made quite a large expense to the city. The smallpox cases at Gonic necessitated the purchasing of a place for a hospital for the care of the cases, but I am happy to say that we were extremely fortunate in suppressing this dreaded disease, and it seems to me that it was very ably handled by our very efficient board of health, and that nothing was left undone to stop its spreading. For further details and reports of this department I will refer you to the report of the board of health.

POLICE DEPARTMENT.

This department, I cannot but feel, has been very fortunate, as we have had no serious breaks, robberies, hold-ups or disturbances on our streets, considering the number of our population and the amount of traffic and travel there is through and about our city. You must consider that when you open up new ways and methods of getting to and from the city, such as running the electric cars through your streets in the city, and they run until twelve o'clock at night, they bring in summer evenings a great many people that might not come otherwise. It is also true to some extent by day.

We ought to have one more officer from ten o'clock in the morning until ten at night at least. There is no city, I think, to be found with the same number of inhabitants and of such railroad facilities, both steam and electric, with so light a police force, but our income of today will hardly allow the extra officer. So we cover the ground the best we can. This department has the hardest of problems to deal with. Some things are not to my liking, but I do not see my way clear to have it otherwise at this time.

STREET LIGHTS.

This is a matter of great importance. There are a few places where it would be desirable to have a new light, but the expense for the street lights is already quite large and our tax rate is as high as it ought to be at this time, so that we feel unable to furnish additional lights in some places where they may seem to be needed, but perhaps by changing some of them that we already have a little, we may be able to remedy this difficulty to some extent.

SCHOOLS.

I am a firm believer in the public schools and think no effort should be spared to make the public schools of Rochester of the best, and to obtain the highest and most practical results is a matter which keeps your committee on schools on the alert, in order that they may reach as high a grade of excellence as possible. For the duties of life of today require a person to be an expert in almost any undertaking in which he may engage, in order to be successful, and as the boys and girls of our schools of today will soon be among the leaders in the churches and schools, socially, politically and otherwise, and in fact in everything pertaining to our city's welfare. It therefore behooves us as citizens of today to give to them our best efforts.

FIRE.

I need hardly say that our fire department, under its efficient management, continues to be of the best, considering what they have to do with, and it well deserves to have good words spoken of it; but that is not all it deserves, as it still has very poor facilities for taking care of its hose wagon and the hook and ladder truck, and there is no accommodation whatever for these two companies. This department has been to an extra expense the past year. I am sorry to say it has exceeded its appropriation about \$1,200, which was caused by the advance of the pay of the firemen. Allow me to say right

here that I think it was a move in the right direction, for I think they deserve it; and as there had not been any new hose bought for this department for the last three years, it was sadly in need of more hose, and also by reason of the fire at East Rochester, where you lost about 400 feet. So that we have had to buy the last year 1,000 feet of hose, also four new Boston Play pipes with nozzles all complete, and six shut-off hydrant gates, and the coats that the men had were all worn out, so you had to buy forty new coats for them at a cost of of \$200.

I would like to see you have a chemical and fire engine combined, but you must have a suitable place for it first. You have built the past year a new fire station at East Rochester which is almost completed. That, when all done, I feel will be a credit to the city and to the fire department, and I once more recommend that a new fire station be built on the McDuffee lot in connection with a stable for the city horses, as the present stable is not what it should be. As I said last year, you might with a slight extra expense add a police station. For as these two, the fire and police departments, mean protection to life and property to our citizens, I think this is one of the most urgent needs of the city at the present time, and if built on this lot you would have ample room on the back end of the lot for all the carts, wagons, road machines, snow plows, sleds, etc. Then your horses and all of these things would be all right here together, and it seems to me that it might be maintained in this way at a much less yearly expense to the city and at the same time be more convenient, as the location is certainly as central as you could get, and besides you would center all of these several things right where they could be looked after. Now it seems to me that this would be a better plan than to go out elsewhere and buy or take any lot that the city now owns at from \$3,000 to \$5,000 expense.

It is true that the material to build today costs a good deal more than it would have a few years ago. Still I think you have built a new fire station and public hall combined at East Rochester the past year about as cheaply as you would have

gotten such a building two or three years ago, notwithstanding the advance in building material during that time. I do not think there is a better building for the money which it will cost in the city than this one. It has been said if I had not recommended this lot last year there would have been a fire station built. Now I am honest in this and still think I am right, but submit it to you to do that which seems to you to be the best for the city and its tax payers.

HIGHWAYS.

This department perhaps receives as much criticism and fault finding as any other department we have, for there are about 150 miles of road to look after with only \$9,000 or \$10,000, to break out sidewalks and the roads in the winter months and to keep them in good repair during the summer months. This has been a difficult department for your committee on highways to handle the past year, owing to their poor condition, caused by reason of the coming of the electric road to no small extent. There has also been a great deal of rain with heavy showers which have washed them very badly during the summer months. The outside districts are in the worst condition and need our attention first this year in May or June at the latest. Horse hill your committee expect and hope to complete this year, which is quite an undertaking, in order to carry out the plans which have been laid out. For it will take in my opinion for that and the new bridge which will have to be built at the foot of the hill about \$1,500 to complete. This department in my opinion ought at least to have \$15,000 per year in order to keep the highways in as good repair as they ought to be. Then there could be \$3,000 to \$5,000 spent in permanent road building. I would like to see a macadamized road from Gonic to the square at Rochester, from East Rochester to the square also, and in fact a mile at least in each one of the streets leading out of the square, aside from these two. If this could be done it would save a great many dollars in helping to keep our streets within the city limits a great deal cleaner and more

wholesome to look upon. If we could afford it and I had my way today I would keep a man and one horse team doing nothing else but keep our square and its incoming streets and gutters cleaned up. I know of nothing which gives a better impression of a city than to come into it and find clean and well kept streets from sidewalk to sidewalk. It gives a good impression to the visiting public of your city and a great deal better satisfaction to your own citizens.

WATER AND DEEP SEWER.

These two departments are so closely allied to one another that they are under one committee, and I am pleased to say they are very ably looked after. For further particulars I will refer you to the report of the committee.

SURFACE SEWER.

There have been 800 feet laid from Portland street to Furber street. The sewer there has been inadequate to carry off the large amount of water that comes down from Summer and Leonard streets to Portland in the spring of the year or at the time of heavy rains, which I think is remedied now for a great many years to come. There have been 520 feet more of new sewer laid and twelve new drops with five new man-holes in the different parts of the city, where the worst places were shown in the spring of the year in the carrying off of water at that time, and I think we shall see good results from the work that has been done along this line. Still there are some more yet. For what of the old brick sewer there is left is almost completely stopped up, but we are continually tearing up and laying over new some part of this sewer each year, so that I think we shall soon have it in the thickly settled part of the city so that it will do its work very well.

SIDEWALKS.

This I believe to be very important to our city, the matter of good sidewalks on our main streets and city in general. There have been in the city proper during the year of 1902, 1,080 running feet of brick walk taken up and laid over new with new edge stones 6x18. There have also been 1,000 running feet of concrete walk repaired, which I think will make it all right for the next five or six years to come at a light expense. At Gonic, by reason of the new bridge built there, it was necessary to take up, grade and lay over 450 running feet of sidewalk. There is still a large amount of walk on both upper and lower Main street, and Union street on one side of it, and from the corner of Union and Wakefield streets to the Dodge property, which ought to be attended to. There are also two or three very bad jogs or set-offs in the sidewalk on our main travelled thoroughfare in the central part of the city, which I would very much like to see remedied.

PARKS AND COMMONS.

Rochester has done nothing to speak of along this line. I sincerely wish we might be able to do a little. We have three spots at least that might be beautified along this line, and once done I think our citizens would be proud of them: Woodman square, and there is a small three cornered lot opposite the Odd Fellows block, between Winter street and the railroad, which, if curbed and fixed up could be made a spot of beauty to look upon. The electric cars pass right by; hundreds of our citizens also pass it to and from their daily labor at the Messrs. Wallace's. There is also the common at the southern part of the city which could be made beautiful. These three places I have spoken of would in the summer season touch up the looks of our city, so that it would attract strangers as well as being gratifying to our citizens, for what looks more cheerful and beautiful in the summer months than a little green grass plot scattered here and there with a few of God's beautiful flowers? All of these things I believe help to bring out the better elements within us and tend to make us all better citizens.

PUBLIC LIBRARY.

The public library continues each year to be of more and more importance to our city and the community. The reading room patronage is also increasing from year to year. This institution is very closely allied to our schools, for it is an educator to our citizens in general. In fact, it is doing a good work and is well patronized, as these figures will show. The number of cards issued is 3,829. The number of books circulated last year was 32,657, making a gain of 1,620 more books taken out of the library than the year previous. The number of readers who used the room the last year was 5,987, making 1,420 more people who visited the library for the purpose of using the reading room than the year previous, which seems to me to be conclusive that it is appreciated by the public in general; but in order to keep it up to the standard you are continually adding new books and the shelf room and reading room accommodations have become inadequate to meet the demands which are made upon it and you can not afford to let this important institution be retarded in its advancement at this time. For further details I will refer you to the report of the trustees of the library.

LEGAL AFFAIRS.

Their every detail has been very carefully watched and ably handled, so that today the legal affairs of the city are in the best of condition. For the first time since it has become a city, it is free from any litigations or suits of any kind whatever.

CONCLUSION.

I still feel it my duty to remind you, in administering the affairs of the city, first of all, of the absolute need of an economical management so as to keep the tax rate as low as possible. Bearing in mind the increased demands which are constantly made upon us, we should be cautious and prudent in our dealings with the appropriation, scanning every item and going slow in our expenditures so far as it is consistent for the city's advancement and prosperity, in order that we may obtain the best results possible for the money expended.

CITY GOVERNMENT

As Organized January 6th, 1903.

MAYOR, WILLIAM G. BRADLEY.

Councilmen.

<i>Ward One</i>	{ J. W. McCrillis, EDWARD C. HAYES, JOSEPH O. HAYES.
<i>Ward Two</i>	{ GEO. V. SEVERANCE, SIMON L. HORNE, CHAS. M. BAILEY.
<i>Ward Three</i>	{ STEPHEN C. MEADER, BENJ. E. HAYES, A. ROSCOE TUTTLE.
<i>Ward Four</i>	{ JOHN MCCUDDY, JR., ARTHUR L. BERRY, ABEL DUPERRY.
<i>Ward Five</i>	{ FRANK B. MAGUIRE, ORRIN A. HOYT, JOHN GREENFIELD.
<i>Ward Six</i>	{ ALEXANDER H. DURGIN, ALBERT WALLACE, CHARLES E. RICKER.

<i>City Clerk</i>	CHAS. W. BROWN

Fence Viewers—James Corson, Chas. W. Dame.

Recommendation of Finance Committee for Annual Appropriation.

We, the committee on finance, having considered the amount necessary for the maintenance of the several departments for the ensuing year, would recommend the following amounts be appropriated for their support:

Hydrants,	\$ 2,000 00
Fire department,	3,000 00
Salaries,	4,200 00
Highways,	10,500 00
Miscellaneous department,	1,300 00
Sampson Post, G. A. R.,	150 00
East Rochester Library and Reading Room,	200 00
Street lights,	6,600 00
City Poor and Soldiers' Aid,	1,400 00
Free Public Library and Reading Room,	1,500 00
Gonic Schoolhouse,	3,268 90
Sewer bonds,	6,500 00
Interest on sewer bonds,	3,000 00
Schools,	21,000 00
Health department,	200 00
County tax,	13,467 38
Sidewalks,	1,713 72
	<hr/>
Total,	\$80,000 00

IMPORTANT RESOLUTIONS AND ORDERS PASSED BY THE CITY COUNCIL.

Resolution for Annual Appropriation.

Resolved by the City Council of the City of Rochester :

That for the support of the various departments for the ensuing year, there be raised by taxation the sum of seventy-nine thousand nine hundred seventy-five dollars and thirty-eight cents (\$79,975 38) and the assessors are hereby directed to assess that amount with such overlay as may be thought necessary. The interest on notes is provided for by the amount coming from the state.

Rochester, N. H., January 7th, 1902.

Passed January 7th, 1902.

Additional Appropriation for High School Building.

Resolved by the Mayor and City Council of the City of Rochester :

That the sum of ten thousand (\$10,000.00) dollars be raised on note or notes of said city, and that said sum shall constitute a portion of the city debt, said money to be used to pay a portion of the debt created by the erection of a new High School building on Wakefield street, and the committee on finance is hereby authorized to negotiate said loan and to renew the same or any portions of the same for a period not exceeding one year.

Passed May 6th, 1902.

Resolution to Hire Money to Complete the New High School Building.

Resolved by the City Council of the City of Rochester :

That for the purpose of completing and grading the grounds at the new High School building, there be raised on note or notes of the city of Rochester, a sum not exceeding \$1,500.00. That said sum of fifteen hundred dollars shall constitute a portion of the city debt.

Passed May 6th, 1902.

Resolution to Purchase Farm and Build- ings to Be Used as a Hospital.

Resolved by the City Council of the City of Rochester :

That for the purpose of purchasing the James J. Henderson farm (so called) to be used by the city as a hospital for contagious diseases, there be raised on note or notes of the city of Rochester, the sum of five hundred dollars. That said sum of five hundred dollars constitute a portion of the city debt.

Passed June 3rd, 1902.

Resolution to Hire Money to Build Fire Station at East Rochester.

Resolved by the City Council of the City of Rochester :

That, for the purpose of building a fire station in the village of East Rochester, there be raised on the note or notes of the city of Rochester a sum not exceeding forty-four hundred dollars. That said sum of forty-four hundred dollars shall constitute a portion of the city debt.

Passed June 3d, 1902.

Resolution to Purchase the Henderson Farm.

Resolved by the City Council of the City of Rochester :

That the city purchase the farm known as the James J. Henderson farm with the buildings thereon to be used as a hospital for contagious diseases. The cost of the same not to exceed five hundred dollars. That the mayor is hereby authorized to take a deed of the same in the name of the city.

Passed June 3d, 1902.

Resolution of Appropriation to Health Department.

Resolved by the City Council of the City of Rochester :

That for the purpose of paying the bills of the health department and meeting future bills that may be contracted during the year, there be raised on note or notes of the city the sum of seven hundred and fifty dollars (\$750). That said sum shall constitute a portion of the city debt.

Passed July 1st, 1902.

Resolution for the Purchase of Rubber Coats for Fire Department.

Resolved by the City Council of the City of Rochester :

That for the purpose of purchasing waterproof coats for the fire department, there be hired on the note or notes of the city a sum not exceeding two hundred dollars. That the same shall constitute a portion of the city debt.

Passed July 1st, 1902.

Additional Appropriation for East Rochester Fire Station.

Resolved by the City Council of the City of Rochester :

That for the purpose of constructing the hose house at East Rochester, there be raised on note or notes of the city of Rochester the sum of one thousand dollars in addition to the amount already voted to be raised. That said sum of one thousand dollars shall constitute a portion of the city debt.

Passed August 5th, 1902.

An Amendment to Chapter VIII of the General Ordinances.

Be it Ordained by the City Council of the City of Rochester as follows :

That Section 1 of Chapter VIII of the General Ordinances of said city of Rochester be hereby amended by striking out the word "fifteen" in the 9th line of said section and inserting in the place thereof the word "eleven," and by striking out the word "twenty" in the 11th line and inserting in the place thereof the word "sixteen," so that said section, as amended, shall read as follows :

SECTION 1. The Fire Department shall consist of chief engineer and of four assistant engineers, one of whom shall reside in East Rochester, one at Gonic, and the other two at Rochester Village; and hose men and hook and ladder men, to be divided into companies as follows: Coheco Hose Co., No. 1, ten men at Rochester Village; Torrent Hose Co., No. 2, ten men at Rochester Village; A. D. Whitehouse Hose Co., No. 3, fifteen men at Gonic; Larkin Harrington Hose Co., No.

4, fifteen men at East Rochester; J. H. Ela Hose Co., No. 5, eleven men at Rochester Village; Resolute Hook and Ladder Co., No. 6, sixteen men at Rochester Village. Said engineers shall constitute a board of engineers and shall perform the duties and exercise the powers of fire wards.

An Amendment to Chapter VIII of the General Ordinances in Relation to the Fire Department.

Be it Ordained by the City Council of the City of Rochester as follows:

Section 19 of Chapter VIII of the General Ordinances of the City of Rochester is hereby amended by striking out the word "twenty" in the third line thereof and inserting in place thereof the word "thirty," so that said section shall read as amended: The annual pay of the members of the department, except the board of engineers, shall be as follows: The members of companies 1, 2, 5 and 6, thirty dollars each; of companies 3 and 4, fifteen dollars each; clerks of companies, each ten dollars; stewards, each fifteen dollars.

Passed February 4th, 1902.

Ordinance in Regard to Expectorating on the Street and Other Public Places. Amendment to Chapter XIII of the General Ordinances.

Be it ordained by the City Council of the City of Rochester as follows:

That Chapter XIII of the General Ordinances of the city of

Rochester be amended as follows: Section 12 shall be numbered section 13 and in place of Section 12 the following shall be inserted to be known as Section 12: "No person shall spit upon the floor of any public conveyance, shop, store, hall, church, school house, railroad station, or other public building in said city, or upon the steps of said conveyance, or building, or upon the sidewalk of any street or way in said city, on penalty of a fine not exceeding ten (10) dollars or be imprisoned not exceeding six months."

Passed August 5th, 1902.

ASSESSORS' INVENTORY, 1902.

Amount expended in excess of appropriation,	\$8 66

Respectfully submitted,

JOHN H. NEAL,

Overseer of Poor.

Dec. 31, 1902.

REPORT OF BOARD OF HEALTH.

To the Mayor and City Council of the City of Rochester, N. H. :

We herewith submit to you our report for the year ending Dec. 31, 1902 :

Whole number afflicted with contagious diseases, not including tuberculosis, or consumption so called,	117
Diphtheria,	70
Scarlet fever,	25
Typhoid fever,	7
Small pox,	7
Measles,	8

Whole number of deaths from contagious diseases, not including tuberculosis or consumption,	8
2 from Typhoid fever.	
6 from Diphtheria.	

Whole number of deaths during the year,	130
Population in 1900,	8,466
Estimated population in 1902,	9,000

Death rate per thousand, reckoning from population of 1900, $15\frac{1}{3}$.

Death rate per thousand, reckoning from estimated population of 1902, $14\frac{2}{3}$.

There have been thirty-two complaints of nuisances made to the board, all of which have been abated. As usual, there have been many minor nuisances abated by the health officer, of which there is no official record.

The health officer has buried twenty-six dead animals.

The percentage of deaths from diphtheria has been $8\frac{2}{3}$. In

the days before anti-toxine was known, the mortality rate was rarely less than 25% and in many epidemics it exceeded 40%.

We wish to emphasize the above facts and impress upon the medical profession and the people in general the necessity of early and free use of anti-toxine in the treatment of this dreaded disease. The consensus of opinion in regard to the use of anti-toxine, arrived at through the observation and experience of those who have had sufficient of both to speak with authority is, that anti-toxine will prevent diphtheria, that it will cure many cases which would otherwise succumb to the disease, and that it is harmless. The reason for the latter statement is that no new complications of serious character have been known to follow the use of anti-toxine. But where death has followed its use, the cause could be attributed to diphtheria, and the only reason for blaming the anti-toxine was that it failed to eradicate the disease. If it is not used early and in large doses its efficiency is impaired and its reputation consequently suffers.

The best treatment for diphtheria is prevention. It is a *filth* disease and consequently preventable. When sanitary conditions are what they should be there will be little opportunity to say anything concerning treatment. At this time we again urge upon the mayor and city council the necessity of sewerage in ward three.

Scarlet fever is a contagious disease and the only way to escape it is to keep away from it.

We have had very little typhoid fever, not enough to approach anything like what is called an epidemic. Typhoid fever, like diphtheria, can originate from other sources than contagion, and is due usually to unsanitary surroundings. Polluted drinking water is one of its most fruitful sources.

Small pox is a contagious and *not* a *filth* disease, but is, without doubt, a *filthy* disease. Contagion is the way by which the disease is propagated. The only known method of prevention, if one comes in contact with the disease, is vaccination. The other method of prevention is to keep away from it.

Either of the above methods is safe and both are recommended by this board. But the former is the safer one, for it protects one whether exposed or otherwise.

It is hardly necessary for us to review the history of the outbreak of small pox in this city during the last season. You are all familiar with the facts, and the expense account will be found under health department.

It may, perhaps, be interesting to you to learn that there have been twenty-seven deaths in this city during 1902 from tuberculosis or consumption. Three times, and more, $3\frac{3}{4}$, as many deaths as from all other contagious diseases combined, including the seventy cases of diphtheria, seven cases of small pox, and twenty-five cases of scarlet fever. It seems to us surprising that people will be so intensely interested in diphtheria, small pox, scarlet fever, typhoid fever, etc., and at the same time treat with indifference a disease which is the most prevalent in New Hampshire, one which destroys more lives than any other malady, one whose greatest mortality is among young persons, a disease which is *communicable* and *preventable*, and a disease which is *CURABLE* in a great majority of cases when taken early and treated in accordance with the best known methods. Consumption is that disease.

All of which is respectfully submitted.

ROCHESTER, N. H., Dec. 31, 1902.

REPORT OF CHIEF ENGINEER OF FIRE DEPARTMENT.

To the Mayor and City Council of City of Rochester :

I herewith submit my fourth annual report of Fire Department for year ending Dec. 31st, 1902.

Whole number of Fires, 16—1 at East Rochester, 1 at Perryville (below Gonic), 1 below Rochester Hill, and 13 in city proper. I have responded to 5 still alarms. We have purchased 1,000 feet of fire hose, 6 shut-off gates, 4 Boston play pipes, and 40 firemen's coats, which were greatly needed by the department. The large expense of this department was caused by the burning of the fire station at East Rochester and the destruction of 400 feet of hose and pipes. We have been as prudent under these circumstances as possible. We believe our department will rank as well as any department in the state. I would again recommend the purchase of a chemical engine, also the building of a fire station. Thanking the board of engineers, also the officers and members of the department, for their ready and willing response to all alarms, and good judgment in discharge of their duties.

Respectfully submitted,

GEORGE H. WEBSTER,

Chief Engineer.

ROCHESTER, N. H., Dec. 31st, 1902.

Rochester Fire Alarm System.

43	Upham street, near school house.
47	Charles street, at car barn.
52	Charles street, corner May street.
54	Charles street, corner Woodman street.

Instructions to Citizens.

1. Upon the discovery of a fire, notice should be immediately communicated to the nearest alarm box, the keys to which are in the hands of all regular police, and in boxes near each alarm box.

2. Upon the discovery of a fire, or positive information of a fire, break the glass in the key box, unlock the box, pull down the hook once as far as it will go (without jerking) and then let go. Shut the door, but do not try to remove the key, as it is locked in by a trap lock, and can only be removed by a release key, which is carried by each of the engineers, who will, as soon as convenient, release and return it.

3. All persons giving fire alarms are requested to remain by the box a moment, and if no clicking is heard in the box, pull again, and if you still hear no clicking, go to the nearest box, procure another key, and give an alarm from that.

4. Never pull an alarm for a fire seen at a distance.

Never touch the box except to give an alarm of fire.

Give an alarm for no cause other than actual fire.

Don't give an alarm for a chimney fire.

5. Owners and occupants of buildings are requested to inform themselves of the location of alarm boxes near their property. Be sure the alarm is promptly and properly given.

Signals.

Two strokes of the bell is the all-out signal.

Six strokes of the bell is for a brush fire, or a fire at a distance, where the fire department will be needed.

One stroke of the bell is the engineer's test.

The above signals are given only by the chief engineer.

 236

I have collected for writ blanks and entries in civil cases, and for copies, etc., from superior court, \$32.33, and have paid the same to the city treasurer.

HENRY F. WALKER,

Clerk.

ROCHESTER, N. H., Jan. 5, 1903.

REPORT OF CITY SOLICITOR.

To the Mayor and Council of the City of Rochester :

GENTLEMEN :—Some years ago I attended a term of court at Farmington, the county seat of Franklin county, Maine. The grand jury of the county, after considering whatever matters were brought before them, presented to the presiding judge no indictments against anyone in the county, but instead thereof presented to him a white glove emblematic of the fact that within the borders of the county no crimes had been committed, and that its citizens had lived in peace and harmony; thus following the custom of our English ancestors, and presenting the most acceptable gift to the government. For the first time in its history as a city Rochester, too, presents to her citizens the white glove.

No suit of any name or nature is now pending against the city and the city is party plaintiff in no action. I know it is a habit to berate and to criticise one's local government, but I think if you will compare our city government with those of other cities, you will find the comparison in favor of the City of Rochester, and the citizens are to be congratulated that so many of its business men are willing to become members of its government, and it is their sound business sense and their practical way of dealing with affairs that has enabled all matters for or against the city to be satisfactorily adjusted, and the citizens are to be congratulated that they can manage their own affairs in their own way and not be tried or placed under guardianship or commissions.

The suits of George E. Greenfield, Mary E. Ward and Herbert Greenfield against the city for the recovery of Wakefield street school house lot, so called, have been disposed of

by the finding of the original deed to the city of the lot, and judgment has been entered for the city in all three cases. This was a deed from John Greenfield to School District No. 8, and was a warranty deed but had never been recorded. The same was found among papers of the late John McDuffee, and with the full report of the building committee and all itemized bills connected with the same. The same had lain in his house for a period of more than fifty (50) years. It seems as though it might be well to call the attention of the City Council that all papers now held by the city should be looked over and record made of everything that is necessary to be done. A little expense at the present time might avoid a larger one later on. I refer not to those papers since we have become a city, which have been well looked after, but to those papers under the town government. Not only are there no suits against the city, but no claims are now pending before the legal affairs committee.

In all matters where there is liable to be an action brought or where evidence is to be looked up by the solicitor, all officers of the city should be required at once to report either to the mayor or to him, so that no delay may be had in the knowledge of the evidence connected with any claim, and I renew my recommendation of last year to that effect. And I wish in closing to express my appreciation of the kind and uniform courtesy shown to me by Mayor Bradley and City Marshal Allen.

Respectfully submitted,

SAMUEL D. FELKER,

City Solicitor.

January 6, 1903.

Ninth Annual Report

OF THE

LIBRARY TRUSTEES

OF THE

ROCHESTER PUBLIC LIBRARY.

1902.

At a meeting of the Trustees of the Rochester Public Library, Dec. 30, 1902, it was voted that the report of the Secretary, Librarian and Treasurer be presented as the annual report of the Trustees.

REPORT OF LIBRARY TRUSTEES.

To the Honorable Council of the City of Rochester :

GENTLEMEN :—I have the honor of presenting in behalf of the trustees of the Rochester public library the ninth annual report of the trustees, librarian and treasurer, for the year 1902.

The report of the librarian gives in detail the work of the last year, and it is a pleasure to report the increased interest manifested by the public as indicated by the increase in circulation, and a larger attendance in the reading room. We are compelled to call again the attention of the honorable council to the lack of room. With the addition of new books each year which the public demands, we must have more shelf room. The popularity of the reading room is attested by the large attendance. At times the capacity has been overtaxed and the librarian has been hard pressed to accommodate the increasing number of readers. The cramped condition of the present room is such that it cripples the work of the library and reading room, and if the council does not take some steps to enlarge the present room, the trustees will be obliged to close this department and use it for library purposes.

The work of the library and reading room might be enlarged in many ways. But with expansion come increased expenses, and a public library is no exception, and whenever retrenchment in library finances becomes necessary the book fund is always the particular one to suffer. In 1901 we expended for new books \$570.70; but owing to increased expenses during the past year, \$453.57, a reduction of \$117.13. The public and continual growth of the library require more funds. How shall we secure them? Let me suggest that some public

spirited citizen endow the library with a fund of \$5,000, the interest of which to be used for the purchase of children's books, and by so doing you will help the finances of the library and provide for the youth of our city interesting and profitable reading matter. Who will respond? Since the organization of the public library we have received one bequest, of \$1,000, which is known as the Jennie Farrington Annex fund. This has been placed on interest in the Rochester Loan and Banking Co. to be used for a definite purpose when a sufficient amount is accumulated. During the year many patrons of the library have expressed a desire for free access to the shelves. The trustees have not thought it wise to grant this request, for it is the experience of libraries granting free access to the shelves, that books not only get misplaced but are not handled with proper care and in some instances they are taken from the shelves and not charged on the cards, and often not returned to the library. Access to the shelves is left to the discretion of the librarian.

Since the catalogue was printed about two thousand volumes have been added to the library and a request is frequently made for a supplementary catalogue. This matter will have to be considered during the coming year and will add to the expenses of the library if printed.

In conclusion, it is the opinion of the trustees that in order to maintain the marvelous progress of our library and meet the demands of the public, the appropriation for the coming year should be not less than \$1,800.00. The demands of the library are many and it has been the endeavor of the trustees to manage its affairs in an economical manner in order to keep within the appropriation. During the year new assistants have been elected to take the place of those resigned.

The trustees commend the faithfulness of the librarian in her efforts to meet the various wants of our library.

JOHN YOUNG,

Secretary.

To the Board of Trustees of the Rochester Public Library:

GENTLEMEN:—I herewith present the ninth annual report of the library, showing something of its work for the year 1902.

According to the census of 1900, the entire population of Rochester is 8,467, of this number 3,829, or nearly one-half, are registered card holders at the library. Perhaps these figures illustrate in some measure what the library is to the community. Three hundred and seven new cards have been issued during 1902.

The report for 1901 shows that 31,036 books were given out for home use. The number given out during 1902 was 32,657, an increase of 1,607 over last year. The number of books issued to teachers for school work being 351. What the people have read is plainly shown by the table giving statistics of circulation appended.

No record has been kept of the books issued for use in the room but the records of reading room attendance show that there have been 1,420 more readers than last year, numbering in all 5,987.

It is often a serious question how to accommodate the large number of readers with the small number of chairs. If a few of those who cannot find seats on busy days, could only come in on Tuesday, Thursday and Friday evenings when empty chairs are easy to find, all would go right, but either there is inspiration in numbers or the majority do not remember that the room is open for readers on these evenings.

The work of the agencies has been faithfully and promptly reported each month and the proper exchanges of books made. East Rochester reports a circulation of 1,000 for the year, 274 less than last year. Gonic, in spite of the fact that the room was closed for two weeks on account of small pox, has given out 1,552 books, 408 more than in 1901.

The number of volumes in the library at last report was 8,299. Since then 341 have been purchased, of which one replaces a copy destroyed; thirty-six are duplicates of new popular

books and the balance, new additions. Twenty-seven volumes were added by the binding of magazines and periodicals and forty-nine were gifts. One volume has been lost, one destroyed, twelve worn out copies discarded and one volume reported lost last year has been found and returned, making the total number of volumes in the library at this time 8,703.

Many libraries are allowing the public access to the shelves; with us this is, at present, impossible to any extent, so books are brought to the people. The new books and others which will interest are placed where all may see and choose. Then if there is a demand along some special line, all the material in the library upon that subject is given a place on the reading room shelves, that each may make his own selection; if there is but little, that little is withdrawn from circulation and placed temporarily in the reference library, that the many may be accommodated. Lists of all new books have been published through the kindness of the Record. These are cut out and kept at the delivery desk. It is not necessary to say that these eighteen or twenty lists are a trifle cumbersome and unsatisfactory, nor that the demand for a printed supplement to the catalogue of 1899 is very great.

One of the perplexing things which confronts the library staff is how to satisfy the demands of from fifty to one hundred people who all want the one, two or sometimes three copies of a popular book. Fixing a seven-day limit, in a family, on each new book has relieved this condition somewhat, but often when the limit is reached, the request for the same book will come in from the house girl, the boarder or the friend, and soon back again it will go into the same family. It is not unusual for a book to be promised for weeks ahead. That this is neither just nor right we feel sure and can only be remedied by labeling new books "not transferable." Life would indeed be pleasant for the library staff as well as the borrower if books could be had for the asking.

Perhaps among the advance steps the thing which has been most appreciated is the circulating of the magazines. The

demand begins before they are taken from the reading tables and is kept up for several months. That they are handled carefully, the fact, that it has not yet been necessary to replace a single number before binding, proves. The 720 given out testifies to their popularity.

Another thing which is appreciated by all who know of it is the arrangement whereby the books may be fumigated, especially those exposed to contagious diseases. Thanks are due to Mr. Goodwin, who has so kindly attended to this duty.

More and more we feel the cramped condition of the room. It is necessary for all the books in a class to be kept together, hence on many of the shelves books have to be piled on books.

The handling and keeping in condition of the 8,703 books, the exchanges with the agencies, with the necessary records of the same, the looking over, classifying, cataloguing and preparing each new book for circulation, the records and reports in each and every department, the necessary correspondence, book lists and shipment of books to and from bindery, together with the care of the periodicals for the reading tables, all takes time. The first duty of the library staff is the attendance upon the public. This requires tact and patience. That those at the delivery desk should not feel a multitude of cares pressing and insisting on haste, in order that the work may all be done, is clearly seen. It is therefore necessary to have help enough to do all the work and do it well.

I wish to acknowledge my gratefulness toward all who have assisted in the work of the library during the year. I also wish to thank the trustees for their confidence and kindness.

Respectfully submitted,

LILLIAN E. PARSHLEY,

Librarian.

Assistants,	204 05
Librarian at Gonic,	50 00
Secretary board of trustees,	20 00
Jennie Farrington Annex fund,	1,000 00
Interest Jennie Farrington Annex fund,	90 99
Balance in treasurer's hand,	11 98
	<hr/> \$2,494 21

Having examined the receipts and expenditures of the financial reports of the Librarian, Lillian E. Parshley, and the Treasurer, John L. Copp, I find the same correctly cast and properly vouched.

JOHN YOUNG,

Secretary Board of Trustees.

Inventory of Real Estate

As Returned by the Assessors, 1902.

Ungraded Schools—Chesley, McGill, Allen.

Truancy—Felker, Hall, Bradley.

Superintendent of Schools—Ernest L. Silver. Office in high school building. Office hour, 4 to 5 P. M.

School Calendar for the Year 1902-1903.

First or fall term began Monday, September 2, 1902.

Recess, November 27 to December 1, 1902.

First term ended December 19, 1902.

Christmas vacation of two weeks ended January 4, 1903.

Second or winter term begins Monday, January 5, 1903.

Second term ends Friday, March 20, 1903.

Spring vacation of two weeks ends April 5, 1903.

Third or spring term begins Monday, April 6, 1903.

Third or spring term ends Friday, June 19, 1903.

Summer vacation begins Saturday, June 20, 1903.

Summer vacation ends Monday, Sept. 7, 1903.

Fall term begins Tuesday, September 8, 1903.

No School Signal.

Two blasts on the fire alarm repeated once will be the signal for no school.

When sounded at 8.00 A. M., there will be no school in the forenoon. When sounded at 12.45 there will be no afternoon session. If school is in session in the morning, the signal sounded at 11.30 will dismiss primary schools at 12.00 M. and grammar schools at 12.45 P. M. for the rest of the day. The signal at 6.30 P. M. will dismiss the evening school.

REPORT OF SUPERINTENDENT.

To the School Board of Rochester :

I have the honor to present at this time my third report as superintendent of your schools.

From January, 1902, to June, 1902, there were in the city twenty-six schools exclusive of the high school. Since the first of September, there have been twenty-four schools exclusive of the high school; but an additional teacher has been necessary in the high school to take charge of the ninth grade pupils, who have been doing high school work in whole or in part. In the high school there are six teachers and five classes. We have eight schools of grammar grade, thirteen of primary grade, and three ungraded.

Enrollment and Attendance.

The total enrollment for the school year ending in June, 1902, was 1,345, a gain of 40. The average membership was 1,057, a gain of 17. The average attendance was 948½, a gain of 20. The percentage of attendance shows a gain of seven-tenths of a per cent. We are very glad to report this increase, but our record of attendance is not yet what it should be; 89.72 is not a good percentage, when no serious epidemics have prevailed. For the current school year, however, we shall not expect a good showing, owing to the prevalence of diphtheria at Gonic and scarlet fever at East Rochester. The Gonic school was closed for four weeks by the board of health. East Rochester school was closed for two weeks during a run of scarlet fever. Last year I took occasion to denounce the evil of tardiness. I regret to have to announce the appalling number of 3,222 tardinesses for the past school year, a gain of

nearly 600 over the year previous. I can not too severely condemn the parent who carelessly or wilfully allows his child to go to school tardy, at least habitually tardy. But while we criticise the parent, we ought to ask ourselves if we are at fault in any way. We have a duty to perform in this matter. The teacher usually gets after the laggard as best she can, but she has no way of getting at the parent. The school board has. The statutes regarding truancy are ample and explicit, and require that the school boards shall suppress it. The truant officer should be given compensation sufficient to warrant his doing thorough work. The amount required would not be burdensome in the least, and the results in increased attendance and decreased tardiness would be most salutary, I believe.

Teachers.

Thirty-two teachers are employed by the city. Few changes in the teaching force have occurred during the past year, fortunately. Frequent changes are undesirable. Last March Miss Lottie E. Neal resigned to accept a position in Hyde Park High School, and Miss Ina E. Tuttle of the Maple Street School resigned on account of ill health. These vacancies were filled by the election of Miss Lillian F. Haines of North Hampton, N. H., and Miss Bessie E. Hoyt of Concord, N. H. Both are graduates of the N. H. State Normal School. Miss Haines is a graduate of Wellesley College, also. In August Miss Frances H. Drake resigned her position in the high school and Miss Emma D. Shelton of Hampton, N. H., a graduate of Boston University, was secured in her place. Miss Florence L. Morrill of the grammar school declined a re-election, and Miss Varney was transferred to her grade. Miss Rollins was placed in charge of the eighth grade. The ninth grade was placed in charge of a new teacher in the high school, Miss Florence E. Loop, a graduate of Wellesley College. In October Miss Chamberlain resigned to go to Concord. Her successor is Miss Katherine L. Locke of Newburyport Training School.

It is a pleasure to me to say that on the whole the teachers are loyal, industrious, interested and competent. Professional spirit is plainly evident in the majority. Several of the most interested teachers have formed a class for the study of pedagogical subjects. The city does well to show its appreciation of hard, honest work, by increasing the salaries of its efficient servants. The small increase granted by the board last June was highly appreciated by the teachers benefited, and served to keep some of our best teachers with us; but if we are to retain the really superior teacher for more than a year or two we must again advance salaries. The difference in intrinsic worth between the ordinary teacher and the good teacher is immeasurably out of proportion to the small increase in salary necessary to keep the good one. Small salaries make our schools training schools for other places. Only those teachers remain with us permanently who are of lesser ability or who have home ties to restrain them. Local teachers are sometimes of the best and the community greatly profits by them, but too many local teachers may be a source of danger to the school system. Rochester ought to pay salaries large enough to command good talent and then command it, irrespective of whether it is local or not. Sentiment ought not to be a factor in the selection of a teacher. The first requisites of a good teacher are a good character and a pleasant disposition. Worldliness and a surly, repressive manner totally unfit one to be a teacher of children. The impressive natures of children should be moulded by the influences of refinement and gentleness. Harsh means seldom make the bad boy good at heart and cross words irritate the finer sensibilities of the more cultured pupils and degrade their spirits. To good character and a cheerful disposition must be added intense interest and enthusiasm for the teaching profession; and interest which extends beyond the pay envelope, beyond the confines of particular text books, beyond the walls of the school room, beyond the hours of class room work; an enthusiasm to be a *living teacher* of little children, a leader of the generation to come. Such a teacher will inform herself along

pedagogical lines, will be a student of education, will attend teachers' meetings in spirit as well as body, and ever will be a friend and an inspiration to her pupils. In these days of progression a course in a good normal or training school is very essential. As a last requisite I would mention scholarship. I place scholarship last, not because I place a low value upon it, but because mere learning will never make a teacher. All the other qualifications are necessary that scholarship may be used to advantage. No person has a right to attempt to teach without a more or less thorough preparation. Furthermore, the teacher must be a constant student, not only of professional subjects but of scholastic subjects as well, or she will fall behind the procession and jog along in the narrow ruts of routine, and become a mere hearer of recitations. The teacher who is not broader than the text book is too narrow to become a teacher of power and an inspirer of youth.

Buildings.

Our new high school building is the pride of us all. It is handsome in structure, convenient in arrangement, the ventilation is good, the heating is sufficient and the building is well equipped in many respects.

The old high school building, though much superior to the old Main street building, needs considerable attention soon. There is no ventilation whatever, except that to be obtained from doors and windows. The heating apparatus is never satisfactory in cold weather and on the coldest days it is impossible to warm the rooms sufficiently to keep school. The situation regarding heat at the Maple street school is even worse. The furnace system there is entirely inadequate. A new furnace or the installation of steam is absolutely necessary. At School street a new building is needed.

Repairs.

During the summer the roof of the old high school building was slated. Radiators were placed in some of the rooms to

supplement the heating surface, but these have not had the desired effect of making the rooms comfortable in the coldest weather. At East Rochester, several hundred dollars have been spent in repairs. The largest item is the cost of putting new tubes in the boiler. Several tubes gave out very suddenly and on investigation it was found that an entirely new set of tubes was necessary. The roof was repaired, the windows were furnished with new curtains and a fence was built. Some other school buildings were shingled. Altogether the cost of repairs during the past year has been larger than usual, partly because very little was spent the year previous.

High School.

The high school in efficiency of management and instruction and in numbers is at present at the highest point it has reached during my term of office. Mr. Getchell and his able assistants show a deep interest in everything that makes for a good school. The promotion last September of a majority of the ninth grade pupils to the high school made the entering class very large and required the services of an extra teacher, but as this arrangement practically reduced the number of grades by one, the number of teachers in the high school building was not changed. I wish to call the attention of the school board to one great need of the high school,—a library for reference. A very pleasant room has been fitted up for a library and is in daily use; but it is extremely limited in scope owing to the paucity of material with which to work. Could a moderate sum of money be appropriated each year for a few years, a very helpful and necessary factor of a well equipped school would be assured. The principal's report is given at this point.

Report of Principal of High School.

Mr. Ernest L. Silver, Superintendent of Schools:

DEAR SIR—In compliance with your request I submit herewith the annual report of the high school for the year 1902.

The enrollment on Dec. 19 was 147, and the membership by classes was as follows:

	1902	1901
I year (entering class),	75	53
II year,	34	25
III year,	19	20
IV year,	19	25
	<hr/> 147	<hr/> 123

By courses:

Classical course,	9	9
Latin-English course,	104	76
English course,	34	38
	<hr/> 147	<hr/> 123

The enrollment for 1901 is added for purposes of comparison.

It will be noted from the above that the membership of the school beginning with the present school year has been the largest in its history. This is due to the simultaneous promotion of two grades from the various grammar schools and raises the question as to whether the increase should be regarded as a permanent one, necessitating the present increase in teaching force and equipment. While there is no sure means of knowing just what proportion of the present entering class will pursue the high school course to the end, yet it is reasonable to assume that it will always be much larger than an average class and for adequate instruction will need to be divided, in most courses, into two or more divisions. The continuance of the present force for another year at least is thus easily apparent.

The most difficult problem now before us, and one which has required a great deal of time and care, is the successful adjustment of this class to normal conditions. It has so far been our policy to allow the greatest possible freedom to the individual pupil and to his parents in the matter of amount and nature of work to be taken. This freedom has been used to the disadvantage of the pupil in but few instances. As the membership of this transition grade will gradually decrease with time, owing to full promotion and other natural causes, we deem it probable that the greater difficulties will vanish with the present year.

In the matter of attendance and punctuality, we feel that for the first time since our connection with the school, we are able to report conditions as good as they can reasonably be expected to be. Tardiness is now limited almost entirely to those who have long distances to come, and who often have real difficulties to encounter. Requests for dismissal are pleasantly infrequent, and the room system now in use makes it possible easily to investigate all absences the reason for which is not at once apparent.

The teaching force during the past year has suffered two losses, and received three additions. Miss Neal resigned during the year to accept a position in the Hyde Park, Mass., High School, and was succeeded by Miss Lillian F. Haines of North Hampton, N. H., who now is in charge of the French courses. Miss Drake resigned at the end of the year to accept a position elsewhere. Miss Emma D. Shelton of Hampton, N. H., and Miss Florence E. Loop of Pittsfield, Mass., became a part of the teaching force at the beginning of the present year. We have no hesitation in stating that the present corps of teachers is, from a principal's standpoint, the most satisfactory with which we have yet had the pleasure of working.

Music and drawing have progressed commendably under the direction respectively of Mr. French and Miss Bunker. An optional class in mechanical drawing was elected by fifteen boys from the upper classes, who are contemplating scientific

and engineering courses. With a more complete equipment this would be a valuable addition to the present curriculum. The high school is beginning to profit by the increased attention now given to music and drawing in the grades.

The year has seen the interior of the high school building improved by the hanging of about \$150 worth of artistically framed pictures. A committee of five ladies kindly undertook the difficult task of making selection and of hanging these pictures to advantage. And it is to be hoped that the plan of decoration adopted by them will be adhered to in the future. A room inharmoniously or tastelessly adorned is hardly preferable to one with bare walls.

The one crying need of the high school now is books; books that will supplement the work of the school and assist the pupil in properly adjusting his present tasks to the needs of the world he is later to meet; books of research and reference and books of inspiration. During an existence of a quarter of a century the Rochester high school has been almost wholly without such books. Let him who reads this, and who realizes even a part of what books have done for himself, think what the loss has been in the lives of scores of boys and girls whose sole opportunity for self improvement has been the high school and its resources. The public library is practically inaccessible, on account of distance, to one-third of the pupils who regularly attend the high school. An appropriation of \$100 a year, or even less, would soon change this regrettable condition into a source of pride.

My thanks at this time are due to school board, teachers, parents and to you, sir, for many acts of kindness and for much valuable assistance.

Respectfully submitted,

FREDERICK G. GETCHELL.

Rhetoricals and Class Day Exercises of the Class of 1902.

ASSEMBLY HALL, HIGH SCHOOL BUILDING, WEDNESDAY,
JUNE 25, 1902, 1.30 P. M.

PROGRAMME.

1. What is Worth While, *Anna Robertson Brown*
Una L. Berry.
2. Moral Courage, *F. W. Farrar*
Carl N. Roberts.
3. Death of Sidney Carton, *Charles Dickens*
*Edith Wallace.
4. Harvard-Yale Football Game, *From Harvard Stories*
Winthrop R. Gerrish.
5. Washington's Contribution to Nationality, *Original*
G. Norman Bankart.
6. Songs of Seven, *Jean Ingelow*
Paulina E. Calef,
Daisy A. Davis,
Mary G. Collins,
Ethel Varney,
Carrie M. Furbush.
7. Michael Strogoff, *Jules Verne*
Elvena Young.

8. The Origin of Music and Its Divine Influence, *Original*
M. Gertrude Fairbanks.
9. Scene from the Merchant of Venice.
Lorenzo, Erlon H. Neal
Jessica, Matilda Wolf
Portia, Eva H. Stone
Nerissa, E. Christina Davis
Bassanio, Ralph E. Abbott
Gratiano, Harry M. Came
Antonio, G. Norman Bankart
Launcelot, Winthrop R. Gerrish
Stephano, Julius B. Wolf
10. Burke's Speech on Conciliation, *Original*
Harry F. Wing.
11. Class History,
Amy E. Sanborn.
12. Class Will,
Alice M. Thompson.
13. Class Prophecy,
Blanche E. McCrillis,
Myrtle Young.

*Excused.

Graduating Exercises.

ROCHESTER HIGH SCHOOL, THURSDAY EVENING, JUNE 26, 1902.

METHODIST CHURCH.

PROGRAMME.

Overture—Northern Lights, *Weidt*
Manning's Orchestra.

School March.

Invocation,
Rev. John Manter.

Flower Song—"Hearts and Flowers," *Tobani*
Manning's Orchestra.

Address—"The Personal Benefits of an Education,"
Prof. Alfred Williams Anthony.

Intermezzo—"Cupid's Garden," *Eugene*
Manning's Orchestra.

Presentation of Diplomas,
Mayor William G. Bradley.

Class Ode, (words and music by Eva H. Stone.)
Class of 1902.

Benediction,
Rev. George W. Farmer.

Class Ode.

When Spring-time comes in shining beauty,
 When mirth and flowers are ev'rywhere,
 Then all one's hopes are bright and joyful,
 And every heart is free from care.

Our class, now looking to the future,
 Stands here in youth and joy to-night:
 The Star of Hope above us gleaming
 Sheds forth a bright and radiant light.

As when the Earth was troubled sorely,
 The only boon to mortals, Hope;
 So we, when cares hang 'round about us,
 May catch a gleam of gracious Hope.

Hope on, though Spring-time may be passing,
 And though our path may not be bright;
 A mightier Hand will ever lead us
 In ways of Honor, Peace and Right.

—EVA HARRIET STONE.

Class of 1902.

Evening Schools.

A year ago I spoke of the importance of opening an evening school for instruction in the elementary branches. I prophesied an appreciation on the part of many for the opportunity opened by such a school. My expectations were not too high. Early in the year an evening school was opened in the Upham street building and was well attended. This fall a very successful school has been conducted in the Main street building, and one at Gonic in one of the rooms below Gonic hall. It has been a source of inspiration to watch the interest and earnestness shown by the pupils, especially the older ones. The city can ill afford to deny the simplest knowledge, at least, of the three R's to those of its citizens who were so unfortunate as not to get it in early life. There is another class who need the night school. They are the children who go to work as soon as they become of age—fourteen—either because of their own desire to be earning money or because of the poverty, more often avariciousness, of their parents. These children will often attend the night school of their own accord or by the will of the parent. I have often found that the parent is anxious that his child shall have an education if that education does not seriously affect the child's earning capacity. It is very important to keep these young people off the streets and maintain their interest in study if possible. A third class of people whom the night school should reach is the compulsory attendance class—those between the ages of sixteen and twenty-one, unable to read and write in the English language. The statute regarding this class should be strictly enforced. In consideration of the possibility of an educational test for the right of suffrage in our state, the coming voter should be prepared to meet it. Furthermore, the welfare of our city and of our state demands that we allow no young person to grow up in illiteracy. The cost of the night schools is not large, the benefits are great. The Gonic school has been open but four weeks, the village school, eighteen. Sessions are held on Mondays, Wednesdays and Fridays from 7.15 to 9 o'clock P. M. The total enrollment for the fall term was 97; the number of teachers, five.

Music and Drawing.

With the beginning of the current school year, music and drawing have been under the direction of different persons. I think that the separation of these two subjects was wise. Under the old system the supervisor's interest was divided between the two subjects. Now we have supervisors who spend the entire time teaching their one specialty. During the summer the board selected Mr. Arthur E. French of Dover, Supervisor of Music, and Miss Eva E. Bunker of Durham, Supervisor of Drawing. Mr. French has carefully prepared himself for his work and enthuses his teachers as well as his pupils.

Miss Bunker, too, is well prepared in her subject and shows much interest in it. Neither Mr. French nor Miss Bunker has yet had time to show any great results, but evidences of improvement in both music and drawing are manifest. The reports of Mr. French and Miss Bunker are herewith given.

Report of Music Supervisor.

To the Superintendent of Schools :

DEAR SIR :—The various methods advocated by different teachers of music of large experience, in our public schools, each of which has its merits in some particulars, but many of which call for corresponding sacrifices in some other directions, might well make it seem egotistical in one to set up a standard, to fall below which would be to condemn the class as to its general grade of work ; so much depends upon the point of view to be taken.

The writer is in hearty sympathy with any effort to enhance the “musical feeling”—the aesthetic, musical temperament of the child, but co-incident with any processes looking to this end, it would seem wise to begin at the earliest practicable moment to train him in the interpretation of musical symbols.

In accordance with the above general principle, the children of the first and second years are given a series of simple, graded rote songs, which, in the first year most particularly, are made the bases of a corresponding series of reading exercises. This process is followed with some modifications during the first half of the second year, when the regular grading of the reading exercises hardly keeps pace with the growing musical capacity of the pupils, and a few rote songs are introduced, exceeding in difficulty the children’s experience in reading.

In the third year, and thereafter, it is expected that the scholars will read all their songs. Carefully graded exercises are prepared for the black-board, and selected from the chart, and book, thus introducing and elaborating each new step in the developing processes, leading sequentially from the simple idea to its practical application in a song.

Practically, it is somewhat difficult to carry these plans to their most successful issue in rooms where more than one grade is maintained. The difficulties are not insuperable, however, and any plans involving practice in reading would involve difficulties under these circumstances.

I find two text-books in use as regular grade readers, and

would recommend that one of these be selected as the standard and the other used as supplementary matter. This would make possible a more perfect grading and there would be no missing links in the sequential order of development.

In most of the rooms the scholars are showing commendable interest. In two or three classes, in the grammar grades, the music which the scholars are able to perform is so far below the grade of their other studies as to be uninteresting to them. Under such circumstances it has been somewhat difficult to get a hearty response to all of our efforts. I am beginning to observe improvement, however, and believe that much will be accomplished by these classes.

In the high school the interest is good. The scholars are able to perform as difficult works as the average high school of its numbers. The young people respond heartily to every effort and seem eager for instruction in the theory of music, which seems to be the side of the subject hitherto most neglected.

I owe my grateful acknowledgments to the scholars for the uniform courteous treatment received at their hands, and for the generally responsive conduct, without which success would be impossible.

I would also acknowledge my obligations to the superintendent and all the teachers for the unfailing support and co-operation given me in my work.

Respectfully submitted,

ARTHUR E. FRENCH.

Report of Drawing Supervisor.

To Mr. Ernest L. Silver, Supt. of Schools:

DEAR SIR:—We are glad to note that at the present time interest in drawing seems to be awakening in both the teachers and pupils. At first the subject seemed new to *all* in a great measure, and because of this friends will of course be considerate when reviewing results. Our aim as teachers should be to work for a clearer knowledge of the principles of good drawing and correct application of the same, and with active interest on our part, the results will be in proportion to our efforts.

The lack of suitable art supplies has crippled our work, but we feel confident that all these things will come, as the *aim* of art in the schools is understood to be a means of cultivating a taste and appreciation of that which is beautiful and true, as well as to give skill in its representation. Mr. H. T. Bailey says, "Its aim is to enlarge the pupil's breadth of view, open to him the world of beauty in nature and the great realms of the arts and crafts, train his taste and give him a degree of skill."

(Dr. Wm. T. Harris.)—"Any exercise which tends to develop a finer perception of beauty, a more discriminating taste, has an industrial value."

(Irene Weir.)—"The art equipment of our public schools must be such that every child can taste of the beauty of the past, and know what to demand for the present. Surely no wiser or saner use for public money can there be than this."

Respectfully submitted,

EVA E. BUNKER.

School Expenses.

In my last report I showed that our schools cost less than those of most cities, and in spite of the fact that the diffuse nature of the population renders necessary in Rochester the maintainance of three separate grammar schools, while more compact cities of our size maintain but one or at most two, grammar schools. The increased cost here is evident. The large rural population renders the cost of transportation also large. But these conditions have to be met and the fact that, notwithstanding the increased cost in these directions, the total cost of our schools per pupil is far below the average, is evidence that the strictest economy is practiced in every department. On first thought our schools will seem to have cost considerably more during the past year than during the year previous; but this is because the number of weeks of schooling paid for from January 1902 to January 1903 was thirty-nine, whereas from January 1901 to January 1902 only thirty-six weeks of school intervened. The total amount of money paid out the past year exceeds the total amount of the previous year, but the average cost per week of school is almost exactly the same for the two years. The high price of fuel and the many repairs necessitated have caused an expense in these accounts exceeding the usual amounts by a thousand dollars. Had it not been for this unusual expense, the cost of schooling per pupil per week would have shown a considerable decrease.

In conclusion, I wish to repeat my assurance of appreciation of the confidence and courtesies shown me by the school board, of the hearty coöperation and good will of the teachers, and of the respect and deference of the public.

Respectfully submitted,

ERNEST L. SILVER.

ROCHESTER, N. H., January 8, 1903.

APPENDIX.

Amendments to the Rules and Regulations of the School Board of Rochester as printed in 1900.

Chapter I, Section 12, has been amended so that the third paragraph of said section shall read :

The certificate given by the superintendent of schools will be good only for one year from the date of its issuance. All teachers, except teachers in the high school, who have not taught in the public schools of Rochester for a period of five years, previous to July 1, 1900, shall be required to take an examination, and after a period of two years from this date all regular teachers shall be required to have a state certificate. Special teachers, who are not qualified as herein set forth, may, however, be elected by receiving ten votes and passing an examination given by the superintendent.

Chapter III, Section 1, has been amended to read :

SECTION 1. *The School Year* shall begin the Tuesday following the first Monday of September and shall consist of thirty-eight weeks in the high school and thirty-seven weeks in all the other schools and be divided into three terms. The length of the terms shall be arranged by the superintendent according to the calendar, with a winter and spring vacation not exceeding four weeks in all.

Chapter III, Section 4, as amended, reads :

SEC. 4. *Recesses*.—Every primary school shall have a recess of fifteen minutes during the morning and ten minutes during the afternoon session. In no case shall a pupil be wholly deprived of a recess as a punishment.

The attention of parents and employers of child labor is called to the following extracts from the public statutes and the rules of the school board of Rochester :

CHAPTER 93, PUBLIC STATUTES.

SEC. 10. No child under the age of twelve years shall be employed in any manufacturing establishment. No child under the age of fourteen years shall be employed in any manufacturing establishment, nor in any mechanical, mercantile, or other employment, during the time in which the public schools are in session in the district in which he resides.

SEC. 11. No child under the age of sixteen years shall be employed in any manufacturing establishment, or in any mechanical, mercantile, or other employment, during the time in which the public schools are in session in the district in which he resides, without first presenting a statement of his age from his parent or guardian sworn to before the superintendent of schools, or if there is no superintendent of schools, before some person authorized by the school board of the district in which such child is employed.

And no child under the age of sixteen years shall be employed as aforesaid during the time in which the public schools are in session in the district in which he resides without first presenting a certificate from the superintendent of schools, or, if there is no superintendent of schools, some person authorized by the school board, that such child can read at sight and write legibly simple sentences in the English language. And any superintendent of schools, or person authorized by the school board, who certifies falsely as to matters prescribed by this section, shall be fined not less than twenty nor more than fifty dollars for each offense.

SEC. 12. No minor shall be employed in any manufacturing establishment, or in any mechanical, mercantile, or other employment, who cannot read at sight and write legibly simple sentences in the English language, while a free public evening school is maintained in the district in which he resides unless he is a regular attendant at such evening school or at a day school; *provided*, that upon presentation by such minor of a certificate signed by a regular practicing physician, and satisfactory to the superintendent of schools, or, where there is no superintendent of schools, the school board, showing that the physical condition of such minor would render such attendance in addition to daily labor prejudicial to his health, said superintendent of schools or school board shall issue a permit authorizing the employment of such minor for such period as said superintendent of schools or school board may determine. Said superintendent of schools or school board or teachers acting under authority thereof, may excuse any absence from such evening school arising from justifiable cause. Any parent, guardian, or custodian who permits to be employed any minor under his control in violation of the provisions of this section shall forfeit not more than twenty dollars for the use of the evening schools of such town or city.

SEC. 13. If any owner, agent, superintendent or overseer of a manufacturing, mechanical, or mercantile establishment or any other person shall employ any child in violation of the provisions of either of the three preceding sections, he shall be fined not exceeding fifty dollars for each offence, for the use of the district.

SEC. 14. Every person having the custody and control of a child between the ages of eight and fourteen years, residing in a school district in which a public school is annually taught, shall cause such child to attend the public school all the time such school is in session, unless the child shall be excused by the school board of the district because his physical or mental condition is such as to prevent his attendance at school for the

period required, or because he was instructed in the English language in a private school approved by the school board for a number of weeks equal to that in which the public school was in session in the common English branches or, having acquired those branches, in other more advanced studies. Any person who does not comply with the requirements of this section shall be fined ten dollars for the first offense and twenty dollars for every subsequent offence, for the use of the district.

SEC. 15. The state superintendent of public instruction shall have authority to enforce the laws relating to attendance at school and the employment of minors, and, for this purpose, he and any deputy appointed by him shall be vested with the powers given by law to truant officers when authorized by school boards to enforce the laws relating to attendance at school and the employment of children. And the expenses necessarily incurred by the state superintendent in such enforcement shall be paid, as audited and allowed by the governor and council.

CHAPTER 4, RULES AND REGULATIONS OF SCHOOL BOARD, CITY OF ROCHESTER.

SEC. 13. *Truancy.*—Teachers shall report the names and residences of all truants and of those suspected of truancy, together with the names of their parents or guardians, to the truant officer as early as practicable. They shall keep a record of the names of all truants, which shall be open at all times to the inspection of the members of the board and of the truant officer.

SEC. 14. *Any child between the age of six and sixteen years, having no regular and lawful occupation, and of sufficient health, neglecting to attend some proper school, or remaining absent, or playing truant therefrom, shall, upon conviction thereof, be fined not exceeding ten dollars; and in default of payment thereof be committed to the industrial school till the*

same be paid or he is otherwise discharged ; or, instead of such fine, he may be sentenced to said industrial school for a term not exceeding one year.

SEC. 15. *It shall be the duty of the superintendent to send a copy of sections 14 and 15 of chapter 94 of the public statutes, and sections 13 and 14 of this chapter of the rules and regulations of the school board to every person who he has reason to believe does not comply with the regulations thereof, and report to the committee on truancy the names of all who still fail to comply therewith ; and it shall be the duty of said committee to see to the enforcement of said statute and said rules.*

VITAL STATISTICS

OF THE

City of Rochester

FOR THE

Year Ending December 31st,
1902.
